INTRODUCTION

Paloma Arillo Aranda, Publications Office

Introduction

- Main milestones of 2022:
 - A **patch version** of the ESPD, v3.0.1, released in February;
 - A **minor version** of the ESPD, v3.1.0, released in December.
- A **major version** of the ESPD-EDM will be release in the first quarter of 2023 (v4.0.0), which will include relevant changes and improvements.

Introduction

During 2022, **7 Open User Community meetings** were held, with an **average participation of above 30 users** from different countries:

Date of the OUC meeting	Number of participants	Different countries
27/01/2022		
24/02/2022	30	13
31/03/2022	35	14
28/04/2022	29	16
16/06/2022	28	11
28/09/2022	29	14
27/10/2022	33	14

Introduction

- During 2022:
 - The **Open User Community** members have opened **38 issues** in GitHub;
 - The **ESPD Team** has solved **29 issues**.
- Currently, there are **14 issues open** in GitHub (5 of those are depending on a third party):

<https://github.com/OP-TED/ESPD-EDM/issues>

ESPD-EDM V3.0.1 (2022 Q1)

Alba Colomer Padrosa, NTTDATA

ESPD-EDM v3.0.1 (2022 Q1)

- ESPD-EDM v3.0.1 was a **patch release** released in **February 2022**.
- The complete distribution package is available in GitHub: [OP-TED/ESPD-EDM Tag v3.0.1](#)
- ESPD-EDM v3.0.1 provided updates covering:
 - Reorganisation of the GitHub repository;
 - Update cardinalities in the online documentation;
 - Update of cardinalities in the xml example files.

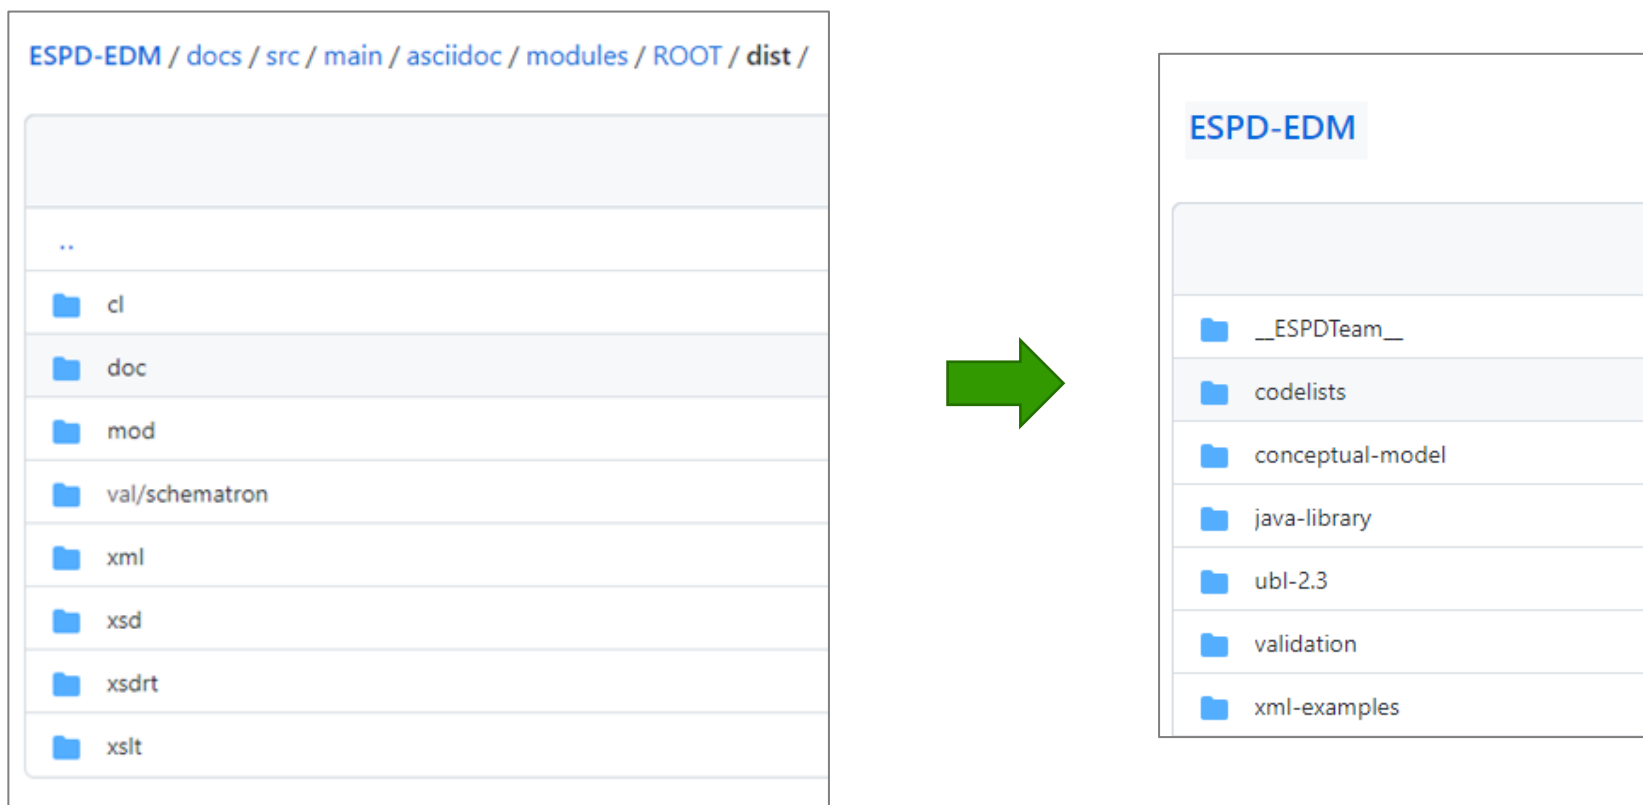

ESPD-EDM v3.0.1 (2022 Q1)

Reorganisation of the GitHub repository (editorial change):

- Reorganise the distribution package folders;
- Update the ESPD-EDM conceptual model;
- Document handbook migration to [Ted Developer Docs](#);
- Update [wiki homepage](#).

ESPD-EDM v3.0.1 (2022 Q1)

Reorganisation of the GitHub repository - Reorganisation of the distribution package folders:

ESPD-EDM v3.0.1 (2022 Q1)

Reorganisation of the GitHub repository
- Update [wiki homepage](#):

Road Map

v3.0.1 Release (February 2022)

This new version of the ESPD-EDM is a patch release which focuses on:

- reorganisation of the GitHub repository
- updating the online documentation as well as the xml example files
- provide a conceptual model specification

For more information regarding the release, please refer to the [release notes](#).

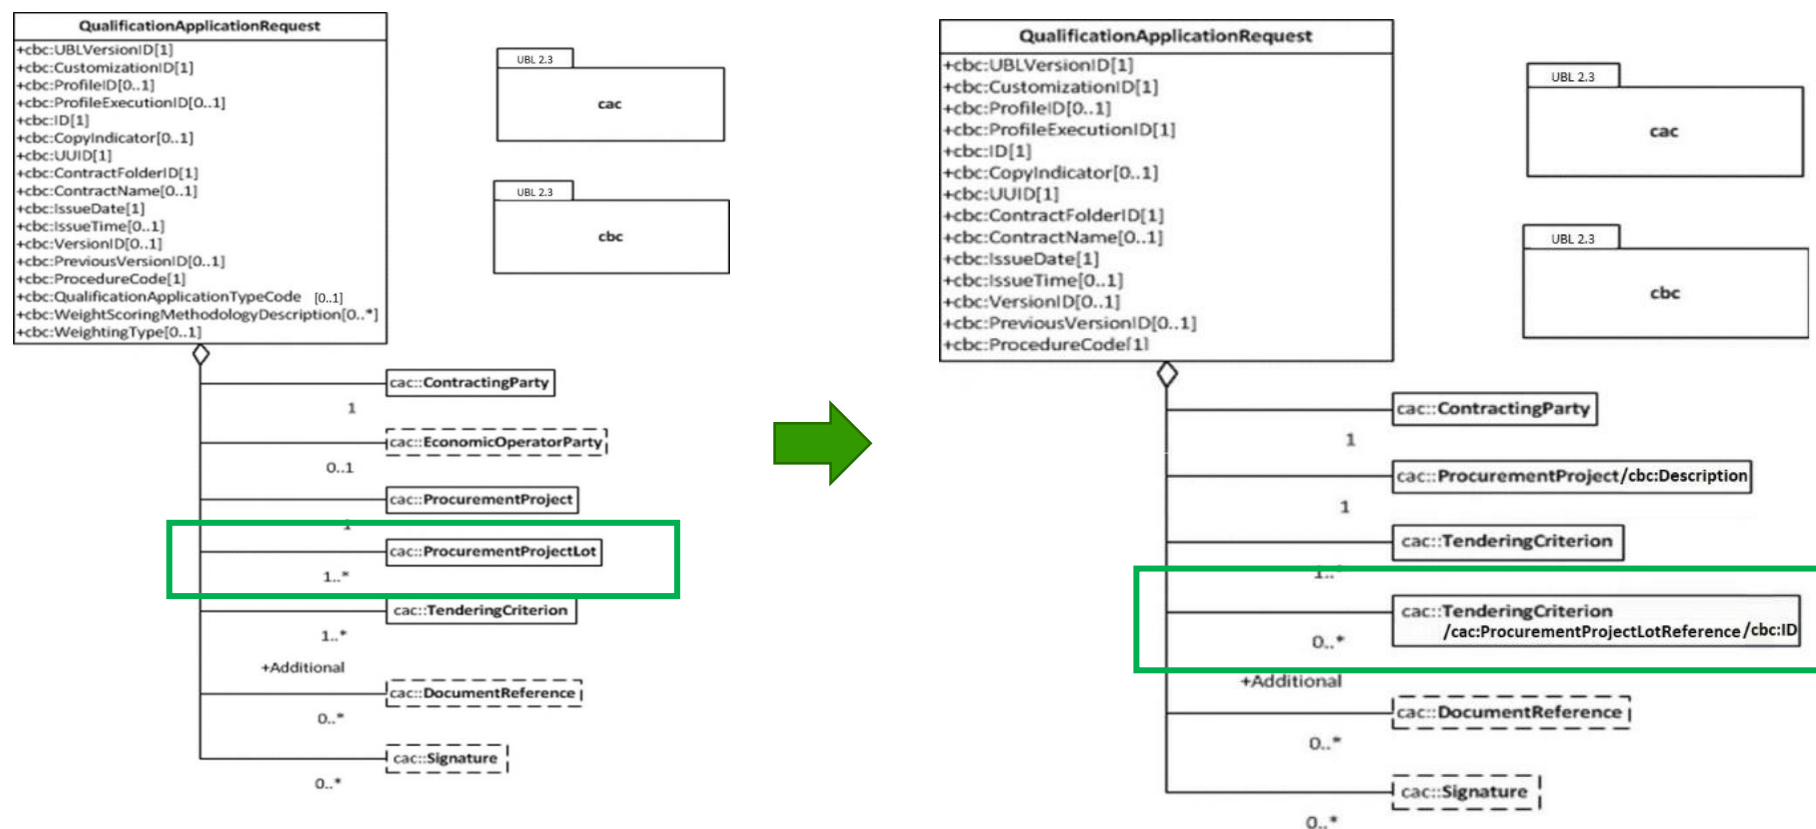

ESPD-EDM v3.0.1 (2022 Q1)

Update cardinalities in the online documentation (small bug fix):

- Update cardinalities according to the online documentation review feedback;
- Coordinated with the conceptual model specification;
- Update code lists to the latest EU Vocabularies version, which implies the creation of TestBed new branch.

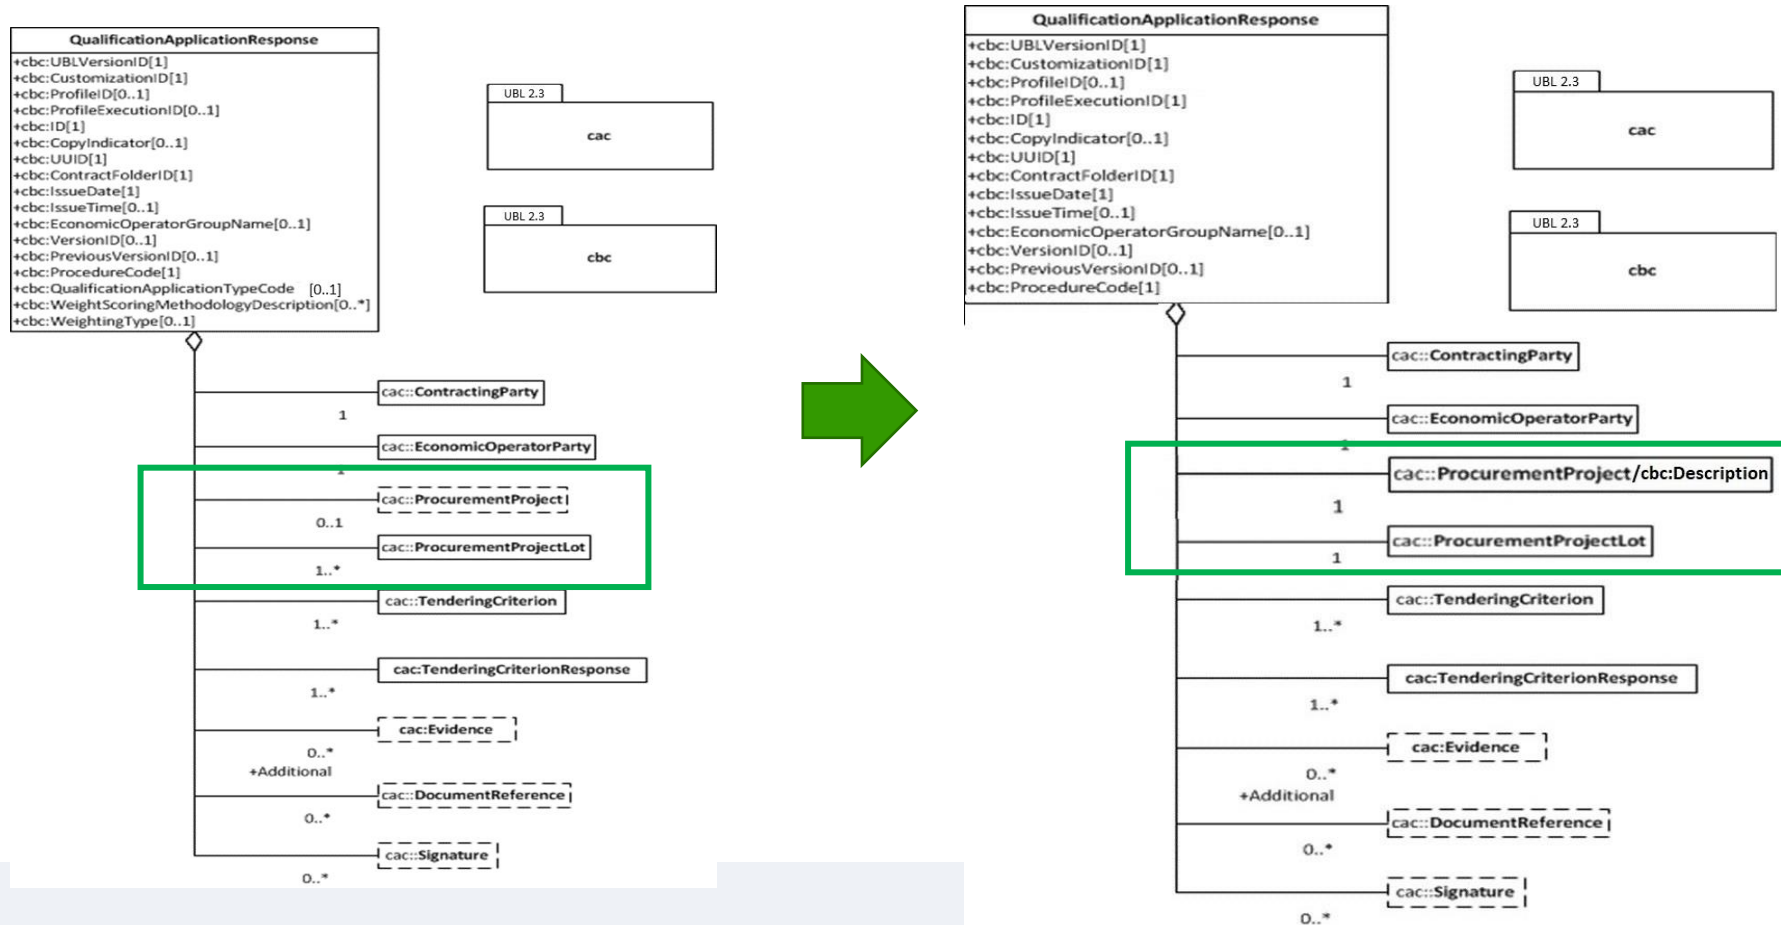

ESPD-EDM v3.0.1 (2022 Q1)

Update cardinalities in the online documentation – ESPD Request:

ESPD-EDM v3.0.1 (2022 Q1)

Update cardinalities in the online documentation – ESPD Response:

ESPD-EDM v3.0.1 (2022 Q1)

Update cardinalities in the online documentation – New version available in [TestBed](#):

The screenshot shows the 'ESPD validator' interface. It has a title 'ESPD validator' at the top. Below it, there are two sections: 'File to validate' and 'Validate as'. The 'File to validate' section has a dropdown menu with 'File' selected and a 'Select file...' button. The 'Validate as' section has a dropdown menu that is open, showing a list of options: 'Request (version 1.0.2)', 'Response (version 1.0.2)', 'Request (version 2.1.1)', 'Response (version 2.1.1)', 'Request (version 3.0.1)', and 'Response (version 3.0.1)'. The last two options are highlighted with a green box. At the bottom of the interface, there is a footer text: 'This service is powered by the Interoperability Test Bed, a conformance testing service offered by the European Commission's DG DIGIT for projects involved in the delivery of cross-border public services. Find out more [here](#).'

ESPD-EDM v3.0.1 (2022 Q1)

Update of cardinalities in the xml example files (small bug fix):

- Update the xml examples according to the online documentation update;
- Small bug fix.

ESPD-EDM V3.1.0 (2022 Q4)

Alba Colomer Padrosa, NTTDATA

ESPD-EDM v3.1.0 (2022 Q4)

- **ESPD-EDM v3.1.0** is a **minor release** that will be released in **December 2022**.
- All changes included in the release are already implemented in the [master branch](#). Currently, the ESPD Team is working in the preparation of the documentation for the release.
- ESPD-EDM v3.1.0 will provide updates covering:
 - Subcontracting proportion;
 - Occupation code list (ESCO);
 - Corrections in the data structure;
 - Schematron rules;
 - Corrections in code lists;
 - Revision of the conceptual model;
 - ESPD Test Cases Mapping Documentation.

ESPD-EDM v3.1.0 (2022 Q4)

Item	Change	Related issues
Subcontracting proportion	A new optional requirement section has been added to the criterion 51 with cardinality 0..n	#287
Occupation code list (ESCO)	<ul style="list-style-type: none">The current technical code list is replaced by the code list provided by EU Vocabularies with the updated values from ESCO (Multilingual classification of European Skills, Competences, Qualifications and Occupations, https://esco.ec.europa.eu/)Removal of the option “Other occupations” from documentation	#307 , #347
Corrections in the data structure	<ul style="list-style-type: none">Data misplacement in several lines in Criteria 35, 52 and 53Incorrect or missing cardinalitiesIncorrect use of the UUIDNew requirement within a requirement group to show the number of fiscal years to be covered	#320 , #322 , #326 , #327 , #333 , #338 , #340 , #343 , #346 , #350

ESPD-EDM v3.1.0 (2022 Q4)

Item	Change	Related issues
Schematron rules	Incorrect validation related to the ProfileID version	#324
Corrections in code lists	<ul style="list-style-type: none">Data Type: date format in code list CriterionFinancial ratio type: inconsistency between the language label and the actual language	#332 , #337

ESPD-EDM v3.1.0 (2022 Q4)

Subcontracting proportion ([#287](#))

An optional requirement section has been added to the criterion 51 with cardinality 0..n.

A new UUID has been generated:

75b14cf3-c30f-4b8f-b9ab-549ff5ba595a

ESPD-EDM v3.1.0 (2022 Q4)

Occupation code list (ESCO) - [#307](#), [#347](#)

- The [Occupation code list](#) maintained by **EU Vocabularies** will be used instead of the technical code list;
- The ESPD-EDM v3.1.0 includes the gc generated by EU Vocabularies, maintains the metadata on the repository, and the validation rules have been updated accordingly;
- This code list **does not include the code "0000.0" - other occupations**;
- Option “Other occupations” has been removed from the data structure in the criterion C25 SC prof-regist, and will also be removed from the documentation to avoid any misunderstanding.

ESPD-EDM v3.1.0 (2022 Q4)

Corrections in the data structure ([#340](#))

- A requirement that represents the number of fiscal years to be covered in the requirement group within criterion "General yearly turnover", has been added;
- An intermediate requirement that represents the selection of "Threshold per year" has been added.

	Name	Description	Value	exam	Cardinality	PropertyDat

ESPD-EDM v3.1.0 (2022 Q4)

Conceptual model

- The conceptual model is available here:

https://docs.ted.europa.eu/ESPD-EDM/3.0.1/attachments/ESPD_CM_html/index.html

- The conceptual model has been **refined and cleansed**, as well as updated to ensure **consistency with the changes of ESPD-EDM v3.1.0** release.
- Both the ESPD-EDM-BusinessView (BOV) and the ESPD-EDM-UBLTechnicalView (TOV) of the conceptual model have been exhaustively reviewed and updated accordingly.
- The conceptual model will be shared with the **eProcurement Ontology Working Group**.

ESPD-EDM v3.1.0 (2022 Q4)

ESPD Test Cases Mapping Documentation

- For ESPD v2, the **document “ESPD Test Cases Mapping”** was available, which provided detailed **information regarding business rules**.
- The **goals** of this document were:
 - For each test case, identify the related business rules, describe the Schematron rules and map them with UBL-2.2 XSD;
 - To validate the criteria taxonomy and facilitate the understanding of the different validation artefacts in the ESPD-EDM.
- Since it has been reported that this document was a helpful tool for technical implementation (GitHub issue [#331](#)), **a simplified version of it is being elaborated** and will be provided as an annex to the Technical Handbook.

Publications Office
of the European Union

ESPD-EDM V4.0.0 (2023 Q1)

Alba Colomer Padrosa, NTTDATA

ESPD-EDM v4.0.0 (2023 Q1)

- **ESPD-EDM v4.0.0** will be a **major release** scheduled for **March 2023**.
- ESPD-EDM v4.0.0 will provide updates covering:
 - Different requirements for different lots;
 - Update of the current UUID for repeatable subgroups;
 - Corrections in the data structure;
 - Purely National Exclusion Grounds;
 - Corrections in code lists.

The final scope of the ESPD-EDM v4.0.0 is pending formal approval from the Change Management Board

ESPD-EDM v4.0.0 (2023 Q1)

Item	Change	Related issues
Different requirements for different lots	<ul style="list-style-type: none">• Correction of an issue so different requirements can be set for different lots within a selection criterion	N/A
Update of the current UUID for repeatable subgroups	<ul style="list-style-type: none">• Update excel criterion files and generation of xml samples files• XSLT updates: transformation from Excel to XML ESPD	#312
Purely National Exclusion Grounds	<ul style="list-style-type: none">• Creation of an xml file test that includes question subgroup with multiple cardinality "1..n" replicated twice, allowing to provide more than one Purely National Exclusion Ground criterion• Update the Data Structure	#334 *
Corrections in code lists	<ul style="list-style-type: none">• Revision of description texts to ensure consistency between eCertis and the Taxonomy• Correction of a duplicated code in the occupations codelist	#336 , #339 , #348
Validation rules	<ul style="list-style-type: none">• Create validation rules for mandatory fields• Create validation rules for all ESPD code lists	N/A

* All tasks completed on ESPD side. Tasks on eCertis side still pending.

ESPD-EDM v4.0.0 (2023 Q1)

Different requirements for different lots

- The ESPD selection criteria include **requirements**, which are specific constraints from the Buyer for specific Lots within a procurement procedure.
- The last major release of the ESPD was aligned with eForms, from both the business and technical perspective.

ESPD Request

Issue:

- **Business view:** There are selection criteria that can implement different requirements per lot
- **Technical view:** The current technical implementation does not allow multiple and different requirement per lot.

ESPD-EDM v4.0.0 (2023 Q1)

REPLACEMENT OF UUIDS (ESPD-EDM V4.0.0)

Alba Colomer Padrosa, NTTDATA

Replacement of UUIDs (ESPD-EDM v4.0.0)

- A universally unique identifier (UUID) is a **128-bit label used for information identification**.
- UUIDs are machine-oriented and not human readable.

Example: a1534624-95cf-4519-bdaa-856d5acf59b6

- When generated according to the standard methods, **UUIDs are**, for practical purposes, **unique**.
- While the probability that a UUID will be duplicated is not zero, it is close enough to zero to be negligible.

Replacement of UUIDs (ESPD-EDM v4.0.0)

- In the ESPD, **2 types of UUID** are used:
 - **Fixed (or static) UUIDs**, for elements such as:
 - Criterion, SubCriterion;
 - Legislation;
 - Group or SubGroup (Question_Group, Question_SubGroup, Requirement_Group, Requirement_SubGroup).
 - **Dynamic UUIDs**, generated at the creation of an ESPD Request or and ESPD Response, for descriptive elements:
 - Question;
 - Requirement;
 - Caption.

Replacement of UUIDs (ESPD-EDM v4.0.0)

- **Problem statement:**

- Currently, questions in criteria need to be instantiated for each procurement procedure instead of reusing criteria from earlier procurement procedures.

- **Business requirements:**

- Ensure the connection for each criterion between ESPD Request and Response;
- Ensure reusability of criteria both in the Request and the Response across procurement procedures;
- Facilitate traceability and The Once-Only Principle (TOOP).

- **Proposed solution:**

- Reduce the randomness on the ESPD Request by no longer using dynamic UUIDs and defining fixed identifiers for requirements and questions (identifiers are already fixed for criteria).

Replacement of UUIDs (ESPD-EDM v4.0.0)

- The current UUID will be replaced by a **pre-defined short tag name for each element and a numbering** according to the position within the tree structure.
- The solution provides a **path to a target criterion element**.
- The new pattern focuses on the alignment of **tags, syntax readability and indexing** separation:

{Prefix+CriterionElementCode}/{InnerPath}/{TargetElement}/{Occurrence}

- C1_EG_crime-org/QG1/QSG1/Q1
- C1_EG_crime-org/QG1/QSG1/Q1/R2
- C32_SC_spec-year-to/RG1/QSG2/Q2/R2

Replacement of UUIDs (ESPD-EDM v4.0.0)

ESPD-EDM v3.1.0 vs ESPD-EDM v4.0.0

Example of the UUIDs that will be removed (in red) and of the new identifiers that will be used for the Request and the Response (in green)

Data type

<cbc:ExpectedValueNumeric>3</cbc:ExpectedValueNumeric>

Value

</cac:TenderingCriterionProperty>

Replacement of UUIDs (ESPD-EDM v4.0.0)

Implications of the solution

- **Dynamic UUIDs** are replaced by an xml path-like pattern;
- **Structure changes:** new tag element (QG1, QSG1, Q1, RG1, RSG1, RQ1, R1, R2) for each element or element group;
- **New algorithm** to automatically compute and analyse the path to each element (question/requirement) in the structure and contents of the ESPD Request and its related ESPD Responses;
- **Criterion files update** (both Excel and XML);
- **Online documentation update.**

Replacement of UUIDs (ESPD-EDM v4.0.0)

Benefits of the solution

- The **link between an ESPD Request and its related ESPD Responses** (one or several) is **consistent**;
- **Same structures** use the **same pattern**;
- There is **no ambiguity** when addressing structures represented by the same pattern;
- The same **data structure can be reused** in different procedures;
- ESPD Responses can be **easily read and mapped**;
- **Content of the ESPD can be easily reused**, except in those cases where requirements are not compatible.

UPDATE OF THE ESPD-EDM WEBPAGES AND DOCUMENTATION

Alba Colomer Padrosa, NTTDATA

Update of the ESPD-EDM webpages and documentation

- From v3.0.1, lateral navigation menu was updated:

- Previous versions are available through drop-down menus at the upper right corner of the screen and at the bottom of the navigation menu.
- Links to eForms and EPO projects were removed (but are still accessible from <https://docs.ted.europa.eu/home/index.html>).

Update of the ESPD-EDM webpages and documentation

- ESPD EDM v3.0.1 webpage: <https://docs.ted.europa.eu/ESPD-EDM/3.0.1/index.html>

ESPD EDM ESPD EDM / Home

3.0.1 ▾

§ Introduction

Article 59 of the new [Public Procurement Directive 2014/24/EC](#) introduced a new concept, the **European Single Procurement Document (ESPD)** which is a self-declaration document intended for preliminary evidence in a public procurement procedure. By mapping out equivalent certificates between Member States, the ESPD replaces certificates issued by public authorities or a third party involved in a procedure. It is thus a valuable facilitator for cross-border participation of a greater number of potential operators in public procurement procedures and a valuable tool for integrating the European Single Market.

The European Commission (EC) has developed a data model and 'semantic assets' for the exchange of the ESPD between any Procurement stakeholder's system. This Wiki aims to be a first landing point for organisations interested in using the model and assets in compliance with the Directive.

Update of the ESPD-EDM webpages and documentation

- ESPD EDM previous versions:

The screenshot displays the 'Ted Developer Docs' website. The top navigation bar includes links for 'Home', 'Products', 'Resources', and 'Helpdesk', along with a 'Search docs' input field. The main content area is titled 'ESPD EDM' and shows the current version as '2.1.1'. On the left sidebar, there are sections for 'eForms SDK' (versions 0.5.0, 0.4.2, 0.3.1, 0.2.1), 'eProcurement Ontology' (versions dev, 2.0.1, 2.0.0, 1.0.0), and 'ESPD EDM' (versions 3.0.1, 2.1.1, 2.1.0, 2.0.2, 1.0.2). The main content area features the title 'ESPD Exchange Data Model (ESPD-EDM)' in green, followed by 'v2.1.1'. Below this, there are sections for 'Resources' and '§ Requirements'. The 'Resources' section lists links for 'ESPD Exchange Data Model Implementation Guide V2.1.1', 'All resources in the distribution package', and 'Release Notes'. The '§ Requirements' section lists 'Java 8' and 'Maven 3'. On the right side, a 'Contents' sidebar lists 'Resources', 'Requirements', 'Installation', 'With Maven', and 'With Gradle'.

Update of the ESPD-EDM webpages and documentation

- Access to online documentation: <https://docs.ted.europa.eu/ESPD-EDM/3.0.1/index.html>

The screenshot shows the 'Ted Developer Docs' website. The main navigation bar includes 'Home', 'Products', 'Resources', and 'Helpdesk', along with a 'Search docs' box. The left sidebar lists the 'ESPD EDM' section with links to 'Home', 'Business Handbook', 'Technical Handbook', 'Conceptual Model HTML', 'Release Notes', 'Open User Community', and 'Documents'. The main content area is titled 'ESPD Exchange Data Model (ESPD-EDM)' and 'v3.0.1'. It features a 'Resources' section with a list of links: 'ESPD BUSINESS HANDBOOK', 'ESPD TECHNICAL HANDBOOK (last updated on 2022-06-13)', 'ESPD-EDM CONCEPTUAL MODEL HTML', and 'Release Notes'. A red rectangle highlights the text '(last updated on 2022-06-13)' in the second link. A 'Contents' sidebar on the right lists 'v3.0.1' and 'Resources'.
