## 4. UUIDs management in eCertis

### Before

#### **Every time a record was updated**

- A new UUID was generated
- ESPD could not retrieve data anymore through the REST API

### Now

#### **Every time a record is updated**

- The same UUID is kept for the record

#### **When a record is created**

- A new UUID is created
- It will stay the same for the full lifecycle

## 4. New criteria in eCertis

- A **new criteria** has been created on eCertis:
  - Authorisation or membership of a particular organisation needed for service contracts
- This is a **merge of two other criteria**:
  - For service contracts: authorisation of particular organisation needed
  - For service contracts: membership of particular organisation needed

## 4. eCertis GitLab
