# eCertis release planning for 2024

# Integration of eCertis, ESPD and eForms

# Objective

- The three services, eCertis, ESPD and eForms have a life on their own.
- To benefit from each other, and to make it easier for buyers, the coming months will be used to describe and define how the different services could work together.
- The main goal is that the buyer would only need to provide the information in the ESPD, and it could be taken over for eForms.
- While the integration would make it easier for buyers, it is not mandatory to do so.

# Desirable future situation

	eCertis	ESPD	eForms
Directive	23/24/25/81	eCertis	All
Code list	<b>Same</b>	<b>Same</b>	<b>Same</b>
Content	Editors	Buyer	Copy

- Notices are often used as a reference for other buyers to see how things can be procured. Therefore, it is good if this information is also available in the notices.

# Current status and next steps

- For eForms SDK 1.12, exclusion grounds and selection criteria are updated ([https://code.europa.eu/eproc/eforms/docs/-/blob/main/codelists/cdl\\_003\\_exg.md](https://code.europa.eu/eproc/eforms/docs/-/blob/main/codelists/cdl_003_exg.md), [https://code.europa.eu/eproc/eforms/docs/-/blob/main/codelists/cdl\\_004\\_slc.md](https://code.europa.eu/eproc/eforms/docs/-/blob/main/codelists/cdl_004_slc.md))
- eCertis will be updated to reflect those updates.
- With this, we will have alignment between eForms and eCertis.

# Thank you
